## Ipack Ima 2022

IPACK-IMA 2022 is an exhibition specializing in food and non-food processing and packaging.

The 25th edition features a visit experience structured according to the target markets of exhibiting companies and meeting the expectations of both visitors and exhibitors.

Technological innovation and internationality play a primary role thanks to strategic partnerships (Fiera Milano - UCIMA) and specific development and promotional plans.

IPACK-IMA 2022 is held in conjunction with the "The Innovation Alliance": 5 synergic fairs offering a high-quality, rich, comprehensive showcase to attract an increasing number of visitors and promote business development.

The Alliance is a collaboration among associations - ACIMGA (machines for converting, package printing and graphics), ARG1 (machines and equipment for graphics and industrial printing), ASSOCOMAPLAST (machines and molds for plastic and rubber) and UCIMA (automatic packaging machines) - along with Fiera Milano and Hannover Fairs International, brings together five Italian and international trade shows of excellence. The idea is to put a strong focus on presenting the entire supply chain for a one-of-a-kind event that is complete and universal in terms of content.

At IPACK IMA 2022, professionals from every industrial sector will be able to find in one location a wide range of offerings - from processing to packaging to the working of plastics and rubber to industrial and commercial printing and the personalization of packaging and labels, all the way to the handling and warehousing of consumer-ready goods.
