Print4All 2021

The great event scheduled two years from now at Fiera Milano will feature the debut of Print4All, the latest addition to the exhibitions catering to the printing world held May 4th - 7th 2021 together with Ipack Ima, Plast, Meat Tech and Intralogistica Italia. Print4All is the result of the collaboration between associations [ACIMGA](#) ^[20] (Italian Manufacturers' Association of Machinery for the Graphic, Converting and Paper Industry) and [Argi](#) ^[21] (the Graphic Industry Suppliers Association), and combines three long-standing brands showcasing specific industrial production chains with strong synergies between the respective target markets: Converflex, Grafitalia and Inprinting.

Print4All caters to the needs of a printing industry that is increasingly market-oriented and is developing cutting-edge services for the business communities of the target markets, against a background of growing cooperation among manufacturers of exo and roto technology, the world of offset and digital printing as well as serigraphy, pad printing and industrial inkjet printing. The event will have a unique format unparalleled in the world and will showcase the industries of printing, printed communication, paper, converting and industrial and digital printing.

Print4All exhibitors will have the chance to present technology applicable across all of the production chains involved in the exhibition project. Visitors will get a comprehensive overview, in a single show, of the technological solutions available in all segments of the industrial supply chain, with strong synergies in terms of market information, technological innovation and best practices in every sector.

For Acimga and Argi, the 2021 exhibitions remain a part of a stepping stone in a three-year project made of extensive collaborations aimed at the production of documents on the development trends of industrial printing and the staging of annual content transfer meetings involving the different players in the industry.
