access related materials.

Event Summary

The manufacturing ecosystem has seen its capacity to plan its
investments ahead fall sharply as a result of the current
pandemic. In this webinar, experts from the Society of
Manufacturing Engineers and the Italian Trade Agency will share
with you the results of an extensive survey on what strategic
changes executives in manufacturing are going to implement to
successfully adapt to the new framework.

Some changes expected to happen in 2030 have been
anticipated to 2021 in the framework of the new normal business
practices.

From this event you'll gain...

- Access to the latest findings from the ITA-SME Post Covid-19
manufacturing study done with 500 manufacturers in the
USMCA
- An understanding and an awareness of new technologies and
best practices related to Smart Manufacturing such as
automation on the factory floor and workforce development
- Actual case study about companies who already over the
course of 2020 have provided solutions helping their USMCA
clients feel as if it's already 2030!

Speakers

- Steve George, Society of Manufacturing Engineers (SME)
Business Intelligence

UCMA

- ASSOFOODTEC / Gelato Machines, Shop Fittings and Equipment Manufacturers – ACOMAG
- ASSOFOODTEC
- ASSOFOODTEC / Meat processing Equipment Manufacturers – COMACA
- ASSOFOODTEC / Association of Manufacturers of Food Slicers, Mincing Machines and Similar Equipment
- ASSOCIAZIONE ITALIANA MARMOMACCHINE
- UNACEA
- FEDERUNACOMA
- UCIMA
- ASSIOT
