Tecnargilla 2012: International Exhibition Of Technology And Supplies For The Ceramics And Bricks

Over the years, Tecnargilla has become the biggest, most important international showcase of technological and stylistic innovation for the ceramics industry, offering a sneak preview of the innovative products of the future.

Tecnargilla also features the widest product range of any fair in its sector, with over 80,000 m² of gross exhibition space housing the key producers of technology for tiles, bricks, refractory materials, and technical ceramics. The 2008 fair drew over 700 exhibitors and 31,400 visitors, 39.2% of them from abroad: over 120 countries around the world.

Tecnargilla is the only occasion to meet the leaders in the ceramics market. It's no coincidence that Tecnargilla is held in Italy, a country that can boast the finest range of ceramics and technology in the world.
