Packology 2013: Exhibition Of Technology For Packaging And Processing

June 11-14, 2013 are the dates when the Rimini Fair District will host the second edition of *PACKOLOGY*, the trade show organised by [UCIMA](#) ^[22] (Italian Packaging Machinery Manufacturers Association) and [Rimini Fiera](#) ^[23] dedicated to packaging and processing, with a special section on packing materials. The exhibition will be aimed mainly at a specific target of visitors consisting of end users from Italy, the Mediterranean area, as well as Eastern and Western Europe.

In addition to the exhibition, the organisers, with the support of a panel of exhibiting companies, have divided the show into four macro-areas of activity to further attract the interest of exhibitors and visitors:

- presentation of already industrialised complete technological solutions;
- space for start-up and research projects focused on innovative packaging solutions;
- a rich schedule of conferences and training on today's most current themes;
- displays and prizes for technological innovations and packaging solutions.

The various elements and sectors presented are the following within the Rimini Expo Center:

PRODUCT SECTORS

Food & Beverage (Halls A3-C3-A5-C5) Non-food, End-of-line, In-house logistics (Hall C1) Packing materials (Hall A1)

technology [14], Coding [15], track & trace and marking systems [16], Automation [17], accessories and components [18], Handling [19], in-house logistics and storage systems and technology [20], Tertiary packaging [21]

EXPO SECTORS - TRADE SECTORS
Machinery and technology for primary, secondary and end-of-line packaging, Machinery and technology for processing, Packaging material and accessories, Labelling machinery and technology, Coding, track & trace and marking systems, Automation, accessories and components, Handling, in-house logistics and storage systems and technology, and Tertiary packaging.
