### Overview:

65 years of history and more than 200.000 machines manufactured and distributed represent the best “business card” to summarize what ATOM brand means in the cutting world: a brand byword of quality, reliability and technology of all the products licensed by the plants of the prestigious company with the headquarters located in Vigevano (Italy).

Products which throughout the years, as a result of constant investment in research and development, moved from the consolidated die cutting presses to the recent prestigious automatic oscillating knife cutting systems. This witnesses the capacity of the company to capture the innovation necessities of the markets and of the most up-to-date customers.

ATOM is in fact, without any doubt, the company world leader in soft and semi-rigid cutting technology, from its reference market - footwear and leather goods - to gaskets, abrasives, plastic materials, composites, cardboards, foams and ... many others.

The production plants located in Novo Hamburgo (Brasil) and Shanghai (P.R. of China) clearly witnesses its attention to the emergent markets thus making ATOM a dynamic and modern company, ready to accept all the challenges of the global world.

With this “mission” always in mind - “Continuous improvement of the quality level and product innovation to increase the customer satisfaction” - the team

manager and the whole ATOM staff, both in Vigevano as well as in the world, guarantee the constant success of ATOM day by day.
