Unitech SRL

Sectors:

[Packaging](#) [5], [Plastics and Rubber](#) [6]

Region:

Lombardia

Overview:

UNITECH srl was founded in 1995. Our main activity is the manufacturing of fully automatic stretch wrapping machines and pallet handling systems in order to develop customized solutions. Through the years, we have increased our offering of packaging systems with fully automatic pallet strapping machines and high speed pre-stretch rewinding machines.

Today we are one of the leading manufacturers of high speed stretch wrapping systems (up to 150 pallets/hour), with a wide experience in packaging solutions. Our experience since 1995, state-of-the-art technology and a dynamic technical team are all elements that enable us to provide innovative and successful solutions to satisfy the diverse and wide range of our customers' needs.

Our main goal is to continue developing new solutions in cooperation with our customers and partners. We know it's equally important to look at the technical side as it is to building long term human relationships. An active collaboration with qualified engineering and manufacturing groups helps us guarantee on-time and on-budget delivery of our systems.

Our experienced technical group provides a prompt and professional field service during installation, commissioning, inspections, routine maintenance and system updates and upgrades.
