## First Gimav Group Participation At Eurasia Glass 2019 <sup>[1]</sup>

### First GIMAV Group Participation at Eurasia Glass 2019

Posted by ITAMachines | 18 Feb 2019

Organized by [Gimav](#) <sup>[13]</sup> jointly with [ITA \(Italian Trade Agency\)](#) <sup>[14]</sup>, this will be the first group attendance by Gimav members at the Istanbul event, to be held on 6-9 March at the Tüyap Fair & Congress Center. The 9th Eurasia Glass event, held concurrently in Istanbul with the Eurasia Window, Glass and Door Exhibition, is the region's foremost trade expo, and focuses on the latest products and applications for the glass sector. For the Italian Glass processing Machinery, Systems, Special Products and Accessories industry, with its distinctive export-oriented nature, this stage is a terrific opportunity to showcase and present its latest innovations to the Eurasian market. Turkey ranks 11th on the industry foreign customers list. With regard to Flat Glass, the Turkish market has shown significant signs of recovery, becoming the 8th destination country for Italian products, two ranks higher than in the previous year. This makes the Punto Italia showcase in Pavilion 12, which will host Italian companies and industry representatives, even more important.

GIMAV member companies at Eurasia 2019

**Schiatti Angelo**

Schiatti Angelo srl celebrates its 50th anniversary this year. The company's core business is grinding and drilling products, offered in a wide range of standard and custom models, in addition to projects and innovative solutions for production process automation.

**Star**

STAR offers the skills, experience and mindset to create turn-key solutions apt to improve capacity, flexibility and productivity through the extensive use of the most advanced technologies for lamination, tempering, and value adding processes, using its own technologies and solutions. More than 1200 "missions accomplished" in 27 countries world-wide are solid proof of STAR's capabilities.

**TK**

The Satinal Group will present STRATO™, the first EVA film Made in Italy, near Milan. Knowledge of this EVA-based material is essential to understanding all of its potential applications and advantages. Being a crosslinking (thermosetting) material, STRATO™ can be applied to safety glass for both architectural and interior design purposes without

the risk of delamination. TK also offers a wide range of furnaces specifically designed for glass lamination, chemical tempering, heat tempering, and HST (Heat Soak Testing). This complete products line provides a unique, high-quality solution that caters to any need glass industry professionals might have.

### Triulzi Cesare Special Equipments

The WPS High Speed Wet Powdering unit, designed for the automotive industry, applies a non-stick talcum coating to the windshield before the bending process. The pre-coating horizontal glass washer/dryer Cristal Mundus is equipped with innovative, degreasing brush units. The same machine is set up to operate with an ultrasonic pre-wash system. New washing solutions for ever-thinner glass display units. The Fireproof automatic glass processing line is another new and proven product, in addition to the brand new, patented and absolutely innovative SURF Line, for the treatment of curved glass.

### Vitrum

Vitrum staff will be on hand to help visitors understand the many advantages of participating in Vitrum 2019, scheduled to be held at Fiera Milano Rho on 1-4 October this year. Exhibitors will have a myriad of opportunities to maximize their return on investment and reap the benefits of participating in the event. Plenty of innovations are in store at this year's event, ranging from the 12 Vitrum Specialized themes that will further enhance visitors' experience, to the brand new, dedicated space for Agents and Representatives. Just a few months after stand spaces went on sale, the 2019 event already promises to be bigger and better than ever, with an extremely high number of foreign and high-quality Exhibitors.
