Xylexpo 2020: 27Th Biennial World Exhibition For Woodworking Technology And Components For The Furniture Industry

The 2020 edition is now scheduled for Tuesday 10th to Friday 13th of November 2020, at Fiera Milano Rho.

So, four days, the same duration as all the most important exhibitions around the world, meeting the requirements not only of exhibitors but also of visitors looking for opportunities that respond to ever faster, more effective, "smart" business approaches...

First signals for Xylexpo 2020. Introducing focus components

We are moving fast towards the next Xylexpo, the international showcase of wood and furniture technologies and supplies, that for the first time will span four days, instead of five. This change has been appreciated by the industry, as witnessed by early registrations that have been submitted slightly "in advance" compared to the past, a signal that the renewed commitment of the biennial exhibition is being recognized. Many industry "big" players have already sent their application forms: Biesse, Cefla, Homag, Ima, Scm, Weinig are leading the group of companies that will attend the exhibition in Milan next November.

"We really feel that our determination to reaffirm the exhibition's role has been readily recognized", said Lorenzo Primultini, president of Xylexpo. "The decision of many companies to come to Milan witnesses to the effectiveness of an exhibition that we want to focus more and more on the quality of the solutions on display, on the most advanced technologies, on real integrated systems. Xylexpo will show the woodworking business and furniture production under a new light, following the momentous change of Industry 4.0".

Xylexpo will have the most representative companies from all

countries, who are leading manufacturers of woodworking technologies exhibiting at the show.

Xylexpo is highly international: during the last edition almost half of the visitors were from abroad and this data confirms once again the centrality and the appeal of Milan.
