## RAMALLUMIN

Sectors:

[Textile Machinery](#) [3]

### Overview:

Ramallumin is specialized in the design and manufacturing of taylor-made machinery for warp preparation.

#### Complete Solutions

We offer complete solutions for warping, indigo dyeing, sizing, drying, cooling, coating, assembling. The main applications are in shirting, terry towels, denim, home textiles, wool, silk, filament, technical textiles, glass technical sector, geo-textiles, digital printing. Our integrated solutions ensure the highest weaving efficiency with less water, less chemicals, less product waste even with different qualities of yarns and chemicals. This is particularly important in the countries where traditional sizing agents are still used.

#### The Technicians' Choice

Our machines are preferred by the technicians who work on them every day and can appreciate the easiness of use and the extreme reliability.

#### Strict Quality Controls

All production process is managed internally with direct control of each phase under the exclusive expertise of our technicians. This allow us to provide extended warranty on our machines.
