1

SIMPLE

Minimize waste and maximize resources: this is the philosophy of our Laundry (R)evolution. We have concentrated the entire finishing cycle in two machines that work in perfect harmony with each other.

LASER BLAZE

Fast, precise, and flexible, it allows you to create authentic vintage effects and create new projects with exceptional ease.

- 100% natural look
- New, high-performance software, adding creative functions
- 4 working positions for a 360° vintage effect
- Automatic size selection
- Remote assistance with Mago

ALL-IN-ONE SYSTEM

All-in-One-System is the Tonello washing machine par excellence, integrated with all the latest sustainable technologies:

- **ECOfree 2** using ozone both in the water and in the air
- **NoStone[®]+** for stone-wash effects without the use of pumice stone
- **UP** for washing processes with at least 50% less water (LR 2:1)
- **Core** nebulizing system increasing performance and reducing water consumption

2

DIGITAL

They are the beating heart of our Laundry (R)evolution: 3 software programs that optimize, control, and analyze the working processes, ensuring unparalleled performance and flexibility.

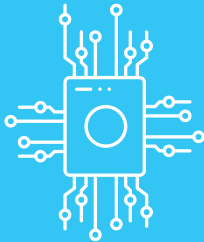

CREA

The brand-new software of Laser Blaze.

- More responsive
- Creative
- User-friendly

The rich library of laser designs gives access to an infinite number of creative combinations, which allow to start the production immediately and create new projects easily

ENGENIOUS

The new Tonello washing and dyeing machine management software to organize all the processes.

- Intuitive
- Flexible
- Advanced multimedia experience

Towards a whole laundry digitalization and the industry of the future.

METRO

Real data, in real time: for checking every type of laundry consumption, for optimizing process times, and improving performance.

- Transparent
- Reliable
- Traceable

Metro brings the entire laundry at your fingertips.

3

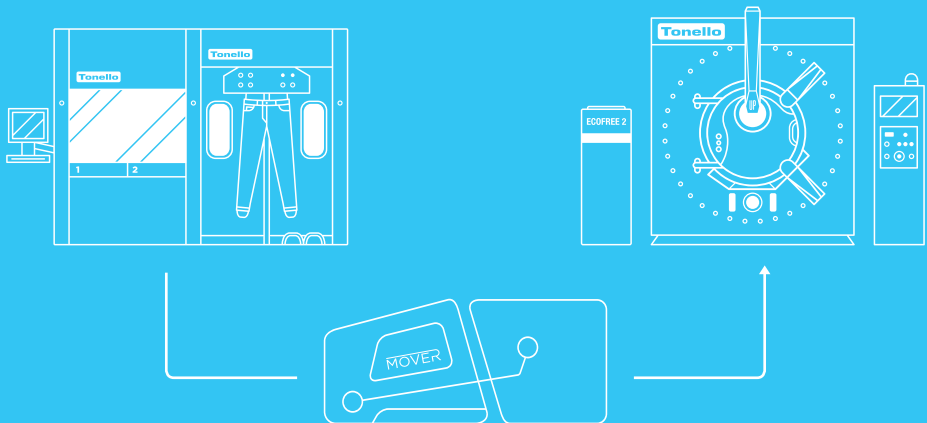

AUTOMATIC

To minimize manual work and therefore errors. A special shuttle that independently does all the loading, unloading, and garment handling from one machine to another.

MOVER

Technological innovation must improve people's lives.

- Reduction in downtime
- Increase in performance
- Improvement in working conditions and environment

THE LAUNDRY (R)EVOLUTION
